The sample was analysed using documented LGC screening methods for the compounds specified in the Testing Specification: Nutritional Supplements V5.

Analytical Result²:

Sample unsuitable for the analysis of:

Amiloride

All other compounds: Negative.

For further information on Analytical Result definitions, refer to Section 3 of the above Testing Specification.

Additional Commentary³:

Please note sample has also been tested at an elevated level for Amiloride only equivalent to 5x the method capability level detailed within Testing Specification: Nutritional Supplements V5. This analysis was successful at the elevated level with no evidence for the presence of this compound at this level.
